

Cryptolepis

CLINICAL APPLICATIONS

- Supports the Body's Defenses Against Immune Challenges
- Promotes Healthy Microbial Balance and Spirochete Load
- Helps Maintain Normal Inflammatory Balance
- Provides Antioxidant Support
- Often Used in Conjunction with Cat's Claw, Japanese Knotweed, Andrographis and Sweet Wormwood

IMMUNE HEALTH

Cryptolepis sanguinolenta is a plant found traditionally in Ghana and other regions of Africa. It helps maintain normal inflammatory and microbial balance, and provides antioxidant support for those with high spirochete load. *Cryptolepis* tincture is often used alongside other plants such as Cat's Claw, Japanese knotweed, *Andrographis*, and Sweet Wormwood for a comprehensive approach to maintaining microbial balance and reducing immune burden.

Overview

Spirochetes are bacteria that have evolved a unique spiral shape and rotational motility that is highly effective at moving through tissue barriers, using their chemotactic sensors to locate nutrients and employ toxin avoidance behaviors.¹ Spirochetes are usually spread by tick bites, and they are often accompanied by other associated microbes that can make recovery especially challenging.²

Microbial Balance and Spirochete Load†

Cryptolepis root has many traditional applications and has been variously used as an herb to support the immune system against parasites and to maintain microbial and inflammatory balance.³ Its main constituents are alkaloids, tannins and flavones.⁴

Cryptolepis and its main alkaloid, cryptolepine, have shown microbial balancing activity for inhibiting unwanted bacterial organisms.^{5,6} Furthermore, cryptolepine has demonstrated potent activity against spirochetes.⁷ In another study, *Cryptolepis* showed strong activity against both growing and non-growing stationary phase spirochetes.⁸

Directions

Mix 1 full dropper (0.7 mL or approximately 25-30 drops) with 2 fluid ounces of water, twice per day or as recommended by your health care professional.

Does Not Contain

Gluten, corn, yeast, artificial colors and flavors.

Cautions

If you are pregnant or nursing, consult your physician before taking this product.

Supplement Facts^{V1}

Serving Size 1 Dropper (0.7 mL)
Servings Per Container About 80

	Amount Per Serving	% Daily Value
<i>Cryptolepis sanguinolenta</i> Root Extract (1:5)	0.7 mL	*

* Daily Value not established.

ID# 176001 2 fl oz (59 mL)
